Gary,

Compared to the concentrations of oil, none of the constituents that we found are going to make a difference. I'll send you some data later today but it's not going to affect the cleanup.

Stephen Halasz, P.G.

Stephen:

Any maps that you have for these areas that show sample locations and the associated results would be helpful.

Stephen:

Excavation of stained soil in the areas impacted will be conducted. Any special things we need to have them look for in a profile for disposal?

see website: www.epaossc.org/FM2725OilSpill

Thanks
